Free

Screening of **Before Their Time**, which focuses on occupational illness from cancer and the fight for health and safety on the job.

Presentations-Speak-out Including Painters Local 4 Retired BA and Cancer survivor Roland Sheppard.

This year we again commemorate Workers Memorial Day, which is the annual international event to commemorate those workers killed on the job and those injured at work.

In California, workers compensation has been deregulated and thousands of workers have had their permanent disability cut by 50%. Also insurance companies and employers are refusing to take care of the healthcare of injured workers and as a result these workers are forced to go onto social security in a cost shifting scam. Some of these workers are also terrorized by insurance companies when they expose workers comp fraud by the insurance industry and employers.

The California Department of Insurance and Cali-

fornia Attorney General have also refused to prosecute any insurance companies for terrorizing injured workers and workers comp fraud for refusing to take care of injured workers.

At the same time in California, there is only one part-time doctor at Cal-Osha covering the 17 million working people of California. How can it be that there are more Fish and Game inspectors than OSHA inspectors for the working people of California?

Come to this Northern California commemoration to tell your story and remember our loved ones we have lost on the job and fight for the living and their families.

Sponsored by California Coalition For Workers Memorial Day
