

Workers Memorial Day Rally and Speak-Out

Stand Up For Injured Workers & Workers Killed On The Job

April 27 (Sunday), 2008
12:00 Noon
Central Park at 4th St. and "C" St.
Davis California

Injured workers in California are under assault. As a result of deregulation of workers compensation, their permanent disability has been slashed more than 50%. They face one obstacle after another with company doctors in medical review boards stalling their healthcare and some injured workers have been retaliated against for filing workers compensation claims by district attorneys who at the

same time refuse to prosecute insurance companies for fraud.

There are more fish and game inspectors in California than OSHA-Inspectors and the last doctor of Cal-OSHA Larry Rose has not been replaced since he retired. The destruction of Ca-OSHA is a threat to every worker and their family in California.

Speakers (Partial list)

Dina Padilla - Pres. B.E.S.T. CA

Dan Berman - Author of "Death On the Job"
